SW Taylor Street Neighborhood Meeting

Wednesday, October 21, 2009- 6:30 PM

**West Tualatin View Elementary School Cafeteria
8800 SW Leahy Road
Portland, OR 97225**

Dear Area Residents:

Residents of SW Taylor Street, between SW 90th Avenue and 9980 SW Taylor Street, have asked Washington County to provide traffic calming. A traffic study conducted in September of 2009 showed the average daily traffic (ADT) was almost 1000 vehicles per day, the 85th percentile speed was around 32 mph and the maximum speed was 50 mph.

According to our ranking, SW Taylor Street is now eligible for Neighborhood Streets Program project funding. We need the assistance of area residents **to develop a traffic-calming plan**.

At the meeting Washington County Staff will describe the Neighborhood Streets Program and the process for developing a plan. We will answer questions, brainstorm solutions, and present traffic calming options for SW Taylor Street. All residents are encouraged to attend this meeting to guide the project design, location, and scope of work for traffic-calming improvements. If you have questions, please contact Michael Mills at (503) 846-7949.

Washington County LUT, Traffic Engineering – 1400 SW Walnut Street, MS 17 – Hillsboro, OR 97123
