

ADDITIONAL SUPPORTING MATERIALS

(Attachments A-M)

Intent & Purpose:

A key element of the Concept Planning process for West Bull Mountain was the research and analysis of existing conditions of the planning area. The results of this research and analyses provided the necessary background information needed to develop the Concept Plan.

This background information and the preliminary infrastructure / urban services analyses, project Goals and Principles along with the Concept Plan and Implementing Strategies, will guide the development of the subsequent Community Plan.

Below is a list of the key background and existing site conditions analyses that have guided the development of the Concept Plan.
