

KICK-START WELLNESS WITH PREVENTION

Kaiser Permanente's Panel Support Tool

Did you know we promote prevention right in the workplace? Our medical assistants (MAs) visit worksites to help members identify the preventive screenings, immunizations, or lab tests they need. They do this in just 15 minutes thanks to our Panel Support Tool, a program that allows them to quickly access each member's electronic health record.

We can currently address 47 care gaps—health issues that may need attention—with our Panel Support Tool. They range from common gaps, like being due for a flu vaccination, to chronic disease care gaps, like needing medication management for diabetes. Once members' needs have been established, MAs can schedule follow-up appointments and even help members choose a primary care provider, if necessary.

A glimpse into what our MAs see when identifying care gaps with our Panel Support Tool.

The popularity of our Panel Support Tool has grown due to large group employers who want health data about their employees. We can show them if employees have care gaps, how many are scheduled for follow-up appointments, and how many are signed up to schedule appointments online or take a Total Health Assessment on **kp.org/myhealthmanager**. In one quick, convenient visit, our Panel Support Tool provides employers with a HIPAA-compliant snapshot of their company's total health.

Due to the growing interest in onsite visits, we have increased the number we can administer this year to 140. If you are interested in hearing more about our Panel Support Tool or any of our wellness programs, please contact your Kaiser Permanente representative.
