## June 2016 request: Examples of poor infill development in your CPO

Washington County Long Range Planning is currently drafting an Issue Paper in response to the CCI request for improved redevelopment or development within established urban neighborhoods. One of the most common issues raised by CPO members is the negative impact of new development on existing development. So far in staff's research, however, it appears that in most cases, surrounding property owners did not have privacy and compatibility concerns about infill development.

Do you have examples of poor infill development to pass on to staff? This may include high density on streets incapable of handling additional traffic or parking, lack of rules for orientation of new homes, a need for screening and buffering to preserve privacy of existing residents, or other issues. Your observations will add value to the work staff is completing.

Please forward examples (with address and Casefile# if possible) to [Suzanne Savin@co.washington.or.us](mailto:Suzanne_Savin@co.washington.or.us) and cc: the CCI Code and Ordinance subcommittee via [marymanseau@gmail.com](mailto:marymanseau@gmail.com) by **June 30, 2106**.

**Take this form to the CCI meeting** and come prepared to share it during the **Roundtable and Emerging Issues** time on the agenda, or in the time reserved for infill development (Land Use Code & Ordinance subcommittee report).

**If you're unable to attend**, send your input to Chair Jim Long or CPO Program Coordinator Dan Schauer (use phones or emails above). **Thank You!**
