AED & Hands Only CPR Training provided by TVF&R

- CPR In a Cardiac Arrest event doubles and sometimes triples the survival rate of the patient

# CPO 6 Meeting Minutes

Thursday, September 7, 2017 at 7:00 pm

- 10% survival rate without CPR
- Pulse Point app notifies you if someone within a 1/4 mile needs CPR. Regular citizens only get public place notifications but firefighters will get in home notifications
- Cascade Training Centers CPR certification classes (search on TVF&R site) are held regularly
- Hands Free CPR Steps
  - Tap Chest and Shout. Ask if the person needs help
  - Move to hard surface
  - Check for breathing and chest movement
  - Designate someone to Call 911
  - Designate someone to get an AED
  - Start compressions right at the nipple line, arm needs to be straight below you and pump two inches (you may hear cartilage and ribs cracking)
  - Do not breath into mouth, adults have several minutes of oxygen stored in blood
  - Switch out people every two minutes to avoid exhaustion until help arrives
- AED
  - Follow Instructions on AED.
  - AED will verbally start advising instructions once on
  - Pads have pictures on where to place
  - AEDs will not shock if heartbeat detected
  - AEDs may also be used on children but are mainly meant for adults. Some kits have pediatric pads -- it is very rare for kids to go into cardiac arrest spontaneously
