Methodology for OR-506 - Hillsboro, Beaverton/Washington County CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	100%
Provider-level surveys	0%
Client-level surveys	0%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Blitz count of persons in shelters (i.e., count occurred at same time to avoid double counting)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data

- Provider-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in emergency shelter capacity
- Change in rapid re-housing capacity
- Change in homelessness prevention capacity

Please provide a brief description of these specific factors (500 word limit):

125 new seasonal beds located in three (3) severe weather shelter sites administered by faith-based organizations were added to the sheltered PIT count on January 23, 2019. 4 overflow beds were added to prevent turn-away from emergency shelter services.

71 additional rapid rehousing beds were available through:

- a) Shift in priority of using Emergency Solution Grant (ESG) from prevention to provide rapid rehousing rent assistance;
- b) Increased occupancy/lease-up of existing rapid rehousing resources in 2019.

Prioritized new local and state funds to provide prevention rent and utility assistance.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - known locations
- "Night of the count" - random sample

- HMIS

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

Yes

7b. How did the CoC select the areas that were included for canvassing?

- Areas were not selected randomly, but an effort was made to use local knowledge to target known locations (e.g., areas with known concentrations of unsheltered homeless people)

7b1. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to account for areas within the CoC geography that were not canvassed but where unsheltered people might have been on the night of the PIT count?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)

- Blitz count of unsheltered people (i.e., canvassing of different areas occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Blitz count of unsheltered people (i.e., sheltered and unsheltered counts occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in PIT count methodology
- Change in emergency shelter capacity
- Change in rapid re-housing capacity

Please provide a brief description of these specific factors (500 word limit):

- HMIS data from street outreach and/or other providers

The unsheltered population reported a net decrease of 127 people for a total of 232 unsheltered people in 2019 PIT, as compared to 359 people in 2018 PIT. The decrease is in adult-only households.

CHANGE IN PIT COUNT METHODOLOGY AND EXPANDED TRAINING

* 125 new Seasonal Beds (zero beds in 2018) were available the night of January 23, 2019 to provide overnight severe weather shelter that served primarily adult-only households. The three shelter sites entered data into HMIS which is reflected in the increased emergency shelter count data.

* 131 volunteers (39 volunteers in 2018) conducted the PIT in all major urban centers on the same date - January 23, 2019 - to include the cities of Cornelius, Forest Grove, Hillsboro, Beaverton, Tigard, and Sherwood. In the six days following, volunteer teams covered known locations where outreach staff have previously identified people staying, as well a service-based count at locations to include soup kitchens, homeless drop-in day centers, etc.

* 6 training sessions (4 training sessions in 2018) were hosted with in-depth review on HUD guidance and review of written instructions to provider agencies and volunteer interviewers. Volunteers were trained on conducting interview using a lens of racial equity and trauma informed care.

INCREASED SHELTER AND RAPID RE-HOUSING CAPACITY

* 125 new Seasonal Beds provided at three faith-based overnight severe weather shelters.

* 14 new year-round emergency shelter beds in the Family Promise of Beaverton program opened in April 2018 to serve families.

* 28 new rapid re-housing beds were created based on the ESG consultation with the CoC that prioritized and shifted ESG from prevention to rapid re-housing.

* 25 additional rapid re-housing beds were occupied in CoC Program-funded projects serving families - CoC RRH for Families and Housing Stabilization Program. These new beds are a result of increased utilization of HUD-funded CoC Program projects.

* 18 additional rapid re-housing beds in the Supportive Services for Veteran Families (SSVF) rehousing program.
