2009 Annual Homeless Assessment Report (AHAR)

Never doubt that a small group of thoughtful, committed people can change the world. Indeed, it is the only thing that ever has.

~Margaret Meade

What is the AHAR?

The Annual Homeless Assessment Report (AHAR) is a report to the U.S. Congress on the extent and nature of homelessness in America. The report is prepared by the Department of Housing and Urban Development (HUD) and provides nationwide estimates of homelessness, including information about the demographic characteristics of homeless persons, service use patterns, and the capacity to house homeless persons. The report is based primarily on Homeless Management Information Systems (HMIS) data about persons who experience homelessness during a 12-month period.

The reports contained in this packet represent the data collection by providers of emergency shelter and transitional housing in Washington County, Oregon for clients served between October 1, 2009 and September 30, 2009. The data was submitted and confirmed by the Washington County Department of Housing Services on December 15, 2009.

Step	Description	Source	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	
1	Unduplicated number of persons in participating in HMIS	HMIS data from providers that participate in HMIS	423	132		50	Persons
2	Number of emergency, year-round equivalent beds in HMIS (i.e., bed capacity for participating providers)	SuperNOFA Housing Inventory Chart	68	95		47	Beds
3	Average number of clients served per bed	Step 1 ÷ Step 2	6.22	1.39		1.06	Persons per Bed
4	Number of, year-round equivalent beds for not participating in HMIS (i.e., bed capacity for non-participating providers)	SuperNOFA Housing Inventory Chart	0	0		0	Beds
5	Estimated unduplicated number of persons served by providers that do not participate in HMIS	Step 3 x Step 4	0	0		0	Persons
6	Estimated number of persons served by participating and non-participating Providers. Note that this estimate double counts people who use participating and non-participating providers. This double count will be eliminated by the overlap adjustment below.	Step 1 + Step 5	423	132		50	Persons
7	Overlap factor is the square of [(Bed capacity for HMIS non-participating providers)/ (Bed capacity for HMIS participating providers)]	(Step 4 ÷ Step 2) x (Step 4 ÷ Step 2)	0.00	0.00		0.00	is overlap factor
8	Number of persons who used more than one HMIS participating provider in the category	HMIS data from providers that participate in HMIS	101	0		0	Persons
9	Estimated number of persons in families that used both participating and non-participating providers	Step 7 x Step 8	0	0		0	is overlap (cross-over) adjustment
10	Total estimate of number persons that used either HMIS participating or non-participating Emergency Shelter	Step 6 – Step 9	423	132		50	Persons

Step	Description	Source	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	
11	Extrapolation Factor for non-participating providers: This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers.	Step 10 ÷ Step 1	1.0000	1.0000		1.0000	is the extrapolation factor for non-participating providers.
12	HMIS bed coverage rate	Step 2 ÷ (Step 2 + Step 4)	100%	100%		100%	% of beds participating in the HMIS
13	Point-In-Time Extrapolation Factor. This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers for values that report Point-in-time numbers. In contrast to the standard "Extrapolation Factor," the point-in-time Extrapolation fact does not include an adjustment for persons using multiple providers.	Step 6 ÷ Step 1	1.0000	1.0000		1.0000	is the extrapolation factor for point-in-time counts.

¹ This reports provides estimates of the homeless individuals and persons in families in Emergency Shelter and transitional housing programs that participate in HMIS, as well as those that do not participate in HMIS. The estimate is an "extrapolated count" and is based on the assumption that beds located in programs that do not participate in HMIS are occupied at the same rate as beds located in HMIS-participating programs. The complete derivation of the total extrapolation factors is detailed in the next table.

Adding values across categories will double count persons who appeared in multiple types of programs.

The estimates do not include persons that are served by "victim service providers," including rape crisis centers, battered women's shelters, domestic violence transitional housing programs, and other programs whose primary mission is to provide services to victims of domestic violence, dating violence, sexual assault, or stalking.

² These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

³ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁴ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

⁵ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁶ These results are generated by dividing the HMIS data on persons on an average night by the total beds in HMIS.

⁷ These results represent the average number of people who use each bed. It is generated by dividing the unduplicated count of persons recorded in HMIS, by the total number of beds in HMIS

⁸ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2).

* This value is generated by multiplying the sum of the extrpolated number of persons in each category by an overlap factor, which accounts for persons who use multiple categories. This value is based on the overlap rates among participating programs and adjusted to account for possible overlap in non-participating providers. In this site the adjustment factor is: For the PIT. These values are generated by adding the point in time counts across categories. It is assumed that persons do not appear in multiple programs on the same night.

3	Average number of clients served per bed	Step 1 ÷ Step 2	7.10	6.22	-12%	1.78	1.39	-22%	n/a	1.23	1.06	-14%	Persons per Bed		
4	Number of, year-round equivalent beds for not participating in HMIS (i.e., bed capacity for non-participating providers)	SuperNOFA Housing Inventory Chart	0	0	0%	21	0	-100%	n/a	13	0	-100%	Beds		
5	Estimated unduplicated number of persons served by providers that do not participate in HMIS	Step 3 x Step 4	0	0	0%	37	0	-100%	n/a	16	0	-100%	Persons		
6	Estimated number of persons served by participating and non-participating Providers. Note that this estimate double counts people who use participating and non-participating providers. This double count will be eliminated by the overlap adjustment below.	Step 1 + Step 5	440	423	-4%	172	132	-23%	n/a	32	50	56%	Persons		
7	Overlap factor is the square of [(Bed capacity for HMIS non-participating providers)/ (Bed capacity for HMIS participating providers)]	(Step 4 ÷ Step 2) x (Step 4 ÷ Step 2)	0.00	0.00	0%	0.08	0.00	-100%	n/a	1.00	0.00	-100%	is overlap factor		
8	Number of persons who used more than one HMIS participating provider in the category	HMIS data from providers that participate in HMIS	58	101	74%	0	0	0%	n/a	0	0	0%	Persons		
9	Estimated number of persons in families that used both participating and non-participating providers	Step 7 x Step 8	0	0	0%	0	0	0%	n/a	0	0	0%	is overlap (cross-over) adjustment		
10	Total estimate of number persons that used either HMIS participating or non-participating Emergency Shelter	Step 6 – Step 9	440	423	-4%	172	132	-23%	n/a	32	50	56%	Persons		
11	Extrapolation Factor for non-participating providers: This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers.	Step 10 ÷ Step 1	1.0000	1.0000	0%	1.2763	1.0000	-22%	n/a	2.0000	1.0000	-50%	is the extrapolation factor for non-participating providers.		
12	HMIS bed coverage rate	Step 2 ÷ (Step 2 + Step 4)	100%	100%	0%	78%	100%	28%	n/a	50%	100%	100%	% of beds participating in the HMIS		

<p>Point-In-Time Extrapolation Factor. This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers for values that report Point-in-time numbers. In contrast to the standard "Extrapolation Factor," the point-in-time Extrapolation fact does not include an adjustment for persons using multiple providers.</p>	<p>Step 6 ÷ Step 1</p>	<p>1.0000</p>	<p>1.0000</p>	<p>0%</p>	<p>1.2763</p>	<p>1.0000</p>	<p>-22%</p>	<p>n/a</p>	<p>2.0000</p>	<p>1.0000</p>	<p>-50%</p>	<p>is the extrapolation factor for point-in-time counts.</p>
--	------------------------	---------------	---------------	-----------	---------------	---------------	-------------	------------	---------------	---------------	-------------	--

* The difference in values shown may not equal the 'Percent Change' column due to rounding.

¹ This reports provides estimates of the homeless individuals and persons in families in Emergency Shelter and transitional housing programs that participate in HMIS, as well as those that do not participate in HMIS. The estimate is an "extrapolated count" and is based on the assumption that beds located in programs that do not participate in HMIS are occupied at the same rate as beds located in HMIS-participating programs. The complete derivation of the total extrapolation factors is detailed in the next table.

Adding values across categories will double count persons who appeared in multiple types of programs.

The estimates do not include persons that are served by "victim service providers," including rape crisis centers, battered women's shelters, domestic violence transitional housing programs, and other programs whose primary mission is to provide services to victims of domestic violence, dating violence, sexual assault, or stalking.

² These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

³ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁴ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

⁵ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁶ These results are generated by dividing the HMIS data on persons on an average night by the total beds in HMIS.

⁷ These results represent the average number of people who use each bed. It is generated by dividing the unduplicated count of persons recorded in HMIS, by the total number of beds in HMIS

⁸ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

* This value is generated by multiplying the sum of the extrapolated number of persons in each category by an overlap factor, which accounts for persons who use multiple categories. This value is based on the overlap rates among participating programs and adjusted to account for possible overlap in non-participating providers. In this site the adjustment factor is: (0.9622 in 2008), (1.0000 in 2009) For the PIT. These values are generated by adding the point in time counts across categories. It is assumed that persons do not appear in multiple programs on the same night.

** Data in this category did not meet minimum participation criteria for participation in HUD's Annual Homeless Assessment Report.
