

# RROMAC's Role Clarified

- Align to the "vision/goals" for Operations & Maintenance so RROMAC understands the priority and can assist in reaching those goals
- Add a high level view of actual against planned activity based upon revenue spent and project status. Not in the weeds level but a high level summary
- Restrict Focus to Rural projects, questions that arise about projects that are better suited for CPOs or URMDAC should be delegated there
- Issue/Action items taken and tracked in agenda and minutes to agreed upon closure.
- This will be our RROMAC metric

(From RROMAC Chair Dan Morgan, February 5, 2018)
