

OVERVIEW: URMD SAFETY IMPROVEMENT PROJECTS

The **Urban Road Maintenance District (URMD)** funds small-scale safety improvement projects, which include sidewalks, pathways, bike lanes and paved shoulders. Since 2011, 41 URMD Safety Improvement Projects totaling over \$14 million have been funded. Over 150 candidates are currently available for consideration. Eligible proposals submitted through July 15 will be considered for FY 2018-2019 funding.

The fundamental criteria:

1. **Safety:** They are intended to improve a specific safety situation.
2. **Location:** They must be located within URMD.
3. **Small scale:** Typical projects cost less than \$500,000, though larger projects may be considered.

URMD project selection process:

Propose a candidate for URMD funding:

To propose a candidate, submit an online form at bit.ly/SRIrequest. Eligible candidates must address a safety or connectivity issue on an URMD-eligible County road. A map of candidates is available at online at arcg.is/SRIcandidates. Questions may be directed to the Operations and Maintenance Division by email lutops@co.washington.or.us or call 503-846-ROAD (846-7623).

Please note: Traffic signals, signs, crosswalks and other pavement markings are handled by the LUT Engineering Section and are not eligible for URMD funding. Questions about these improvements may be sent to lutproj@co.washington.or.us.
