ADDITIONAL BACKGROUND INFORMATION:

Public Health 101 Series

To help members better understand the role of governmental public health, we're continuing to utilize a portion of our monthly meeting to introduce public health and the sciences essential to public health.

This month we'll be learning more about [epidemiology](#). Kim Repp, Chief Epidemiologist for Washington County and supervisor of our Research, Analytics, Informatics and Data Program (RAID) will be reviewing key concepts and terms, how we calculate rates, approaches and methodologies, and data sources and study design.

For folks who may be more visual learners, here's a link to the [epidemiology video series](#) from Let's Learn Public Health. You can also watch this [two-part video series](#) from the CDC on public health careers in epidemiology.

Washington County Emergency Medical Services

This month the PHAC is being asked to provide support for proclaiming May 19-25 as National EMS Week in Washington County. Adrienne Donner, Emergency Medical Services Program Supervisor will be providing a brief presentation on the Emergency Medical Services system in Washington County.
